

## WRI P8000 SERIES

WIRE ROPE ISOLATORS

**LOGGERS**

## INTRODUCTION

Loggers WRI Series polycal wire rope isolators offer cost-effective and durable protection against shock and vibration. These all-metal isolators are captive, which means that the connection between the mounted object and its foundation is ensured at all times. WRI Series isolators are easy to install, maintenance-free and renowned for their long lifetime. Typical applications include the shockproof mounting of cabinets, equipment and packaging and within crating solutions.

The specialists of our Center of Excellence assist clients worldwide with the application of wire rope isolators for their systems. Their approach ensures that the optimal isolator for a specific situation is selected. Important calculation parameters such as the object's mass, center of gravity, vibration and desired rest shock levels are taken into account during the selection process.

Please note that this datasheet covers standard versions only. Loggers polycal wire rope isolators can be tailored to meet specific client requirements.

## GENERAL PROPERTIES

- Reliable, captive shock and vibration isolator
- Polycal shape
- Temperature range: - 180 °C to + 300 °C
- Bars: aluminum alloy  
Cable: Ø8mm, stainless steel
- Top bar: 1 mounting hole (through, Ø7 mm), M10 insert optional.  
Bottom bar: 2 mounting holes (through, Ø7 mm)

## DIMENSIONS

Dimensions in mm. For reference only.

Model	height H (mm)	width W (mm)	length L (mm)	mass (kg)

P8030	62	71	89	0,23
P8050	74	79	93	0,25
P8070	87	86	103	0,26
P8080	104	99	116	0,28

## WRI P8000 SERIES CHARACTERISTICS

The characteristics provided in this document allow basic selection of P8000 Series wire rope isolators, based upon their characteristics for maximum static load and shock. Please note that more detailed characteristics and curves are available upon request.

### Compression and tension

## ABOUT LOGGERS

Loggers is thought leader and international recognized solution provider in the field of shock, vibration and noise control. With excellent technical know-how in combination with proven market knowledge and experience Loggers designs, develops and engineers innovative solutions for the most complex and challenging situations for leading clients worldwide for over 95 years.

Loggers understands all difficulties in the area of vibration, shock and noise control entirely. We bring up the best and most cost effective solution for every challenge, regardless of its complexity. Loggers defines and engineers all deliverables necessary for solving your problem, ranging from standard to tailor-made solutions. Loggers' state-of-the-art portfolio contains all products and services to provide you with the optimal solution for relatively simple as well as the most complex challenges.

### Products

- Vibration isolators
- Expansion joints
- Shock isolators

### Services

- Assessment of current situation (on site)
- Analysis design including construction drawings
- Structural design and stress analysis
- Vibration measurement and analysis, if needed on site
- Solution definition based on: standard products, customized products, or even tailor-made new products
- Complete simulation of solution to ensure its effectiveness
- Testing including certification by independent certification authorities

Loggers understands both business and technology and brings both worlds together in satisfying customers' needs in rapidly changing environments. By working closely with clients Loggers enables them to realize their strategic targets through solving specific operational issues in the following market segments:

- Shipbuilding
- Dredging
- Defense
- Machinery
- Offshore
- Transport
